

Xtern

# BOOTCAMP

**Week 1 | Day 3**  
**May 17, 2017**

# Review

# Objects

# Creating an object

```
const things = {}
```

# Adding properties

```
const things = {  
  country: 'USA'  
}
```

```
things.animals = ['dog', 'rhino']
```

# Functions as Properties

```
things.explode = function() {  
  alert('KABOOM')  
}
```

# Accessing Properties

```
things.animals  
things['KABOOM']
```

# Functions

# Function expressions

```
function sum(a, b) {  
    return a + b  
}
```

# Functions as variables

```
const sum = function(a, b) {  
    return a + b  
}
```

```
const sum = (a, b) => {  
    return a + b  
}
```

# Function invocation

```
const sum = function(a, b) {  
    // this === ?  
    return a + b;  
};  
sum(2, 3);
```

# Function invocation

```
const sum = function(a, b) {  
    // this === window  
    return a + b;  
};  
sum(2, 3);
```

# Function invocation

```
const sum = (a, b) => {  
    // this === ?  
  
    return a + b;  
};  
sum(2, 3);
```

# Function invocation

```
const sum = (a, b) => {  
    // this === whatever `this` is in  
    // the surrounding function  
    return a + b;  
};  
sum(2, 3);
```

# Function invocation

```
myButton.addEventListener((ev) => {  
    // this === ev.target  
})
```

# Methods

(functions as object properties)

```
const thing = {  
  explode() {  
    alert('KABOOM')  
  }  
}
```

# Method Invocation

```
const thing = {  
  explode() {  
    // this === ?  
    alert('KABOOM')  
  };  
  thing.explode()  
}
```

# Method Invocation

```
const thing = {  
  explode() {  
    // this === thing  
    alert('KABOOM')  
  };  
  thing.explode()  
}
```
